Written Testimony Please choose the humane option - please support Bill 22 and choose to stop the abuse and killing of so very many animals every year. Euthanization should be the very last resort, not the "best option" at animal control. It is so expensive to have a pet sterilized. I believe it is much more humane and productive to have animals sterilized to prevent over-population rather than continuing the cycle of reproduction-and-euthanization that is the current standard here in the state of Hawaii. Most states are moving away from the euthanization standard and moving towards the humane and more successful method of Trap-Neuter-Sterilize-Return. This same model is also being used internationally! Public money would be much better spent in preventing animal reproduction, particularly by providing low-cost spay and neuter options.
